

Let Better Comfort Fit In

With The High Performance Mini-duct Heating And Cooling System

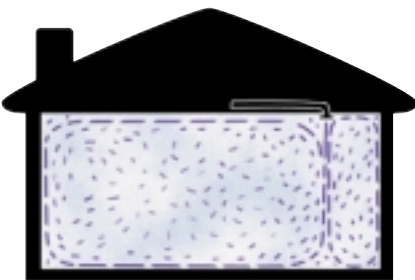

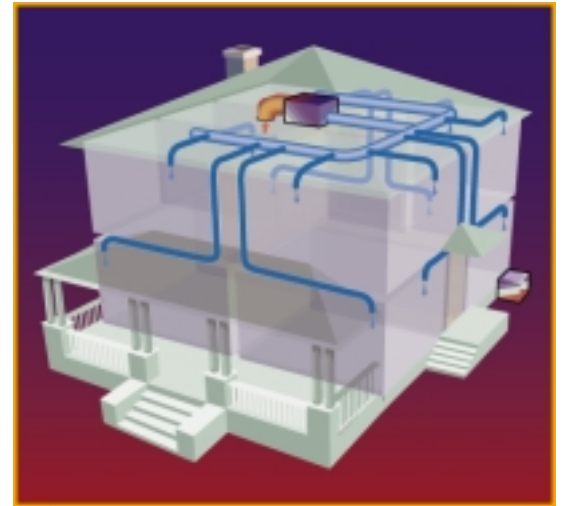

Perfect For Retrofit Applications

Less Mess, Less Dust, Less Time – More Comfort!

No matter when your home was built or what the physical configurations are, you can install the Unico System for high performance heating and cooling. Crafted to weave around and through construction, the Unico System allows you to maintain the architectural integrity of your home without invasive demolition for installation. Homeowners enjoy its many advantages over conventional systems:

Little or No Remodeling Is Needed

The flexible mini-ducts can be routed through existing cavities in ceilings, wall and floors – it fits where other systems can't!

The Unico System gently circulates air throughout each room.

Conventional systems dump air which causes drafts and uneven temperatures.

Even Temperatures Without Drafts and Noise

The Unico System works on the principle of aspiration. Streams of air gently mix with existing air currents and provide even temperatures from floor to ceiling. Sound dampening supply tubes deliver draft-free comfort to every room without the pop and bang of metal ducts.

Conventional System

Unico System

◀ **Less Humidity For More Comfort**

The Unico System provides an excellent degree of comfort without humidity by removing 30% more moisture from the air in cooling mode.

Installation Is Less Messy!

The Unico System is far less disruptive and easier to install than conventional systems. There's no need to "gut" the home, so there's less mess, less dust, less time – and more comfort!

Flexible Options for Heating and Cooling

From brownstones to Victorian to ranch, the Unico System fits where conventional systems won't. Five applications are offered:

- Heat Pump
- Standard Cooling
- Chilled Water Cooling
- Hot Water Heating
- Electric Add-on Heat

Matches Any Décor

With the Unico System, the aesthetics of the interior home are maintained as well. Walls are not marred by metal registers that streak or stain. Instead, small subtle outlets can be painted or stained to blend into any room.

Original

5" Outer Diameter Outlet for Ceiling Applications

Wooden

5" Outer Diameter Outlet for Hardwood Floor Application

Slotted

1/2" x 8" Slotted Outlet for Sidewall Applications

All across the country, homeowners are turning to the Unico System for retrofit applications, the superior choice in heating and cooling for renovated homes!
