

14 SEER High-Efficiency Air Conditioners and Heat Pumps

Enhanced

A higher degree of quiet,
efficient comfort.

Enjoy maximum **comfort**
and **money-saving** efficiency.

A soft, cushioned chair. A light silk robe. It's that added touch of comfort that can make all the difference. And that's what you get when you choose an Enhanced Concept H air conditioner for your cooling needs. Enhanced with high-performance features like an insulated scroll compressor, Enhanced Concept H air conditioners provide a superior level of quiet, consistent comfort. And efficient operation delivers substantial energy savings, compared to conventional units. For year-round comfort and efficiency in warmer climates, Enhanced Concept H heat pumps are also available.

**Approximate Five-Year Savings
for Enhanced Concept H - 14 SEER**

Current Air Conditioner Efficiency

Cooling Based on 36,000 BTUH unit at 1,000 hours annual operation with the National Average electric rate of \$.0841/kWh.

Seasonal Energy Efficiency Ratio (SEER): The total cooling of a central unitary air conditioner or unitary heat pump in BTUs during its normal annual usage period for cooling divided by the total electric energy input in watt-hours during the same period.

- Air Conditioners – up to 14.0 SEER***
- Heat Pumps – up to 14.0 SEER; up to 9.2 HSPF****
- 10-year limited warranty – compressor**
- 5-year limited warranty – parts**

Higher energy efficiency helps lower utility bills.

Enhanced Concept H high-efficiency air conditioners and heat pumps exceed **ENERGY STAR®** guidelines, which means higher energy performance and savings. With an **efficiency rating of 14 SEER** (Seasonal Energy Efficiency Ratio), these units can **dramatically reduce your energy costs**, compared to older, less efficient units.

A blanket of insulation lets you relax in quiet comfort.

Enhanced Concept H air conditioners and heat pumps are designed to keep you comfortable, while keeping noise at a minimum. For example, a blanket of insulation surrounding the compressor significantly **reduces operating sound**. And Enhanced Concept H heat pumps use **QuietShift™ technology** to control sound levels when the unit is in the defrost cycle.

Quality construction provides long-lasting reliability.

You can count on Enhanced Concept H air conditioners and heat pumps to deliver years of **dependable comfort**. The Copeland Scroll™ compressor is engineered with fewer and more **durable components** than conventional compressors. And **louvered panels made of heavy-duty steel** cover and protect exterior coils from the elements. Plus, all units feature **Copeland Comfort Alert® diagnostics** to assist technicians with quick and accurate servicing—helping keep your unit operating at peak performance.

*SEER-Seasonal Energy Efficiency Ratio
**HSPF-Heating Seasonal Performance Factor

This product exceeds ENERGY STAR requirements when appropriate coils are used. Ask your contractor for details.
